Cancer Letters, 71 (1993) 211–213
Elsevier Scientific Publishers Ireland Ltd.

Subject Index
Volume 71

A/J mice, tobacco, carcinogenesis, *N*-nitrosamines, tumours, 25
Acenaphtho(1,2-b)quinolines, mutagenic activity, *Salmonella* assay, 1
Agarose, spheroid, growth, 31
Antiproliferative effect, RU486, Burkitt lymphoma cells, 43
Apoptosis, TRPM-2, liver, gene expression, mitogen, regeneration, 133
Argyophilic nucleolar organizer regions, lesions, 197
Aristolochic acid, orotic acid, liver carcinogenesis, initiation, cell proliferation, 83

BALB/3T3 cells, 3-nitro-2,4,6-trihydroxybenzamide derivatives, promotion process, two-stage transformation, 5-lipoxygenase, 57
Benzo[*a*]pyrene, phenethyl isothiocyanate, mouse lung neoplasia, DNA adducts, 35
Brain carcinogenesis, diamine oxidase, glioma, *N*-ethyl-*N*-nitrosourea, polyamines, putrescine, 183
Breast cancer MCF7 cells, ICAM-1, cell cycle, IL-6+TNFα synergy, flow cytometry, 143
Burkitt lymphoma cells, RU486, antiproliferative effect, 43

c-*met*, regeneration, oncogene, 119
Calcium antagonist, ovarian cancer cells, calcium channels, Fura-2, 5
Calcium channels, ovarian cancer cells, calcium antagonist, Fura-2, 5
Calcium, hepatoma cells, tumor promoter, cell proliferation, protein kinase C, epidermal growth factor, vasopressin, 103
Cancer, electromagnetic fields, rats, mammary gland, 75
Carcinoembryonic antigen, cell adhesion, interferon-γ, cell aggregation, colon cancer, 109
Carcinogenesis, gap junctions, lung, mouse, tumor promotion, 11
Carcinogenesis, organotin, tumour promotion, neoplastic transformation, 167
Carcinogenesis, tobacco, *N*-nitrosamines, tumours, A/J mice, 25
Cell adhesion, interferon-γ, cell aggregation, colon cancer, carcinoembryonic antigen, 109
Cell aggregation, cell adhesion, interferon-γ, colon cancer, carcinoembryonic antigen, 109
Cell cycle, breast cancer MCF7 cells, ICAM-1, IL-6+TNFα synergy, flow cytometry, 143
Cell cycle, TGFβ, gene expression, 125
Cell proliferation, aristolochic acid, orotic acid, liver carcinogenesis, initiation, 83
Cell proliferation, hepatoma cells, tumor promoter, protein kinase C, calcium, epidermal growth factor, vasopressin, 103
Class mu glutathione*S*-transferase, lung cancer, smoking habit, polymerase chain reaction, 151
Colon cancer, cell adhesion, interferon-γ, cell aggregation, carcinoembryonic antigen, 109
Connoxin, gap junctional intercellular communication, human liver cells, 157

Diamine oxidase, brain carcinogenesis, glioma, *N*-ethyl-*N*-nitrosourea, polyamines, putrescine, 183
Differentiation, insulin-like growth factor II, neuroblastoma, retinoic acid, 177
DNA adducts, phenethyl isothiocyanate, mouse lung neoplasia, benzo[*a*]pyrene, 35

Electromagnetic fields, cancer, rats, mammary gland, 75
Endothelial cells, growth factors, non-small cell lung cancer, 203
Epidermal growth factor, hepatoma cells, tumor promoter, cell proliferation, protein kinase C, calcium, vasopressin, 103
Ethyl methanesulphonate, tamoxifen, rat mammary carcinoma, 19

Flow cytometry, breast cancer MCF7 cells, ICAM-1, cell cycle, IL-6+TNFα synergy, 143
Fura-2, ovarian cancer cells, calcium antagonist, calcium channels, 5

Gap junctional intercellular communication, connoxin, human liver cells, 157
Gap junctions, lung, mouse, tumor promotion, carcinogenesis, 11
Gene expression, TGFβ, cell cycle, 125
Gene expression, TRPM-2, apoptosis, liver, mitogen, regeneration, 133
Glioma, brain carcinogenesis, diamine oxidase, *N*-ethyl-*N*-nitrosourea, polyamines, putrescine, 183
Glutathione*S*-transferase, hepatocarcinogenesis, placental form, rat liver, immunohistochemistry, initiated hepatocytes, 89
Growth factors, endothelial cells, non-small cell lung cancer, 203
Growth factors, prostate cancer, peptide analogs, 189
Growth, spheroid, agarose, 31

Hepatocarcinogenesis, glutathione*S*-transferase, placental form, rat liver, immunohistochemistry, initiated hepatocytes, 89
Hepatoma cells, tumor promoter, cell proliferation, protein kinase C, calcium, epidermal growth factor, vasopressin, 103

Human liver cells, gap junctional intercellular communication, connoxin, 157
8-Hydroxy-2′-deoxyguanosine, ^{32}P-postlabeling, mass spectrometry, *N*-(deoxyguanosin-8-yl)-1-amino-6-nitropyrene, 5-hydroxymethyl-2′-deoxyuridine, 51
5-Hydroxymethyl-2′-deoxyuridine, ^{32}P-postlabeling, mass spectrometry, *N*-(deoxyguanosin-8-yl)-1-amino-6-nitropyrene, 8-hydroxy-2′-deoxyguanosine, 51

ICAM-1, breast cancer MCF7 cells, cell cycle, IL-6+TNFα synergy, flow cytometry, 143
IL-6+TNFα synergy, breast cancer MCF7 cells, ICAM-1, cell cycle, flow cytometry, 143
Immunohistochemistry, hepatocarcinogenesis, glutathione *S*-transferase, placental form, rat liver, initiated hepatocytes, 89
Initiated hepatocytes, hepatocarcinogenesis, glutathione *S*-transferase, placental form, rat liver, immunohistochemistry, 89
Initiation, aristolochic acid, orotic acid, liver carcinogenesis, cell proliferation, 83
Insulin-like growth factor II, neuroblastoma, retinoic acid, differentiation, 177
Interferon-γ, cell adhesion, cell aggregation, colon cancer, carcinoembryonic antigen, 109

Lesions, argyophilic nucleolar organizer regions, 197
5-Lipoxygenase, 3-nitro-2,4,6-trihydroxybenzamide derivatives, promotion process, two-stage transformation, BALB/3T3 cells, 57
Liver carcinogenesis, aristolochic acid, orotic acid, initiation, cell proliferation, 83
Liver, TRPM-2, apoptosis, gene expression, mitogen, regeneration, 133
Lung cancer, *Rb* gene abnormalities, 67
Lung cancer, smoking habit, class mu glutathione*S*-transferase, polymerase chain reaction, 151
Lung, gap junctions, mouse, tumor promotion, carcinogenesis, 11

Mammary gland, cancer, electromagnetic fields, rats, 75
Marine natural product, multidrug-resistance reversal, patellamide D, 97
Mass spectrometry, ^{32}P-postlabeling, *N*-(deoxyguanosin-8-yl)-1-amino-6-nitropyrene, 5-hydroxymethyl-2′-deoxyuridine, 8-hydroxy-2′-deoxyguanosine, 51
Mitogen, TRPM-2, apoptosis, liver, gene expression, regeneration, 133
Mouse lung neoplasia, phenethyl isothiocyanate, benzo[*a*]-pyrene, DNA adducts, 35
Mouse, gap junctions, lung, tumor promotion, carcinogenesis, 11
Multidrug-resistance reversal, marine natural product, patellamide D, 97
Mutagenic activity, acenaphtho(1,2-b)quinolines, *Salmonella* assay, 1

N-nitrosamines, tobacco, carcinogenesis, tumours, A/J mice, 25
N-(deoxyguanosin-8-yl)-1-amino-6-nitropyrene, ^{32}P-postlabeling, mass spectrometry, 5-hydroxymethyl-2′-deoxyuridine, 8-hydroxy-2′-deoxyguanosine, 51
N-ethyl-*N*-nitrosourea, brain carcinogenesis, diamine oxidase, glioma, polyamines, putrescine, 183
Neoplastic transformation, organotin, tumour promotion, carcinogenesis, 167
Neuroblastoma, insulin-like growth factor II, retinoic acid, differentiation, 177
3-Nitro-2,4,6-trihydroxybenzamide derivatives, promotion process, two-stage transformation, BALB/3T3 cells, 5-lipoxygenase, 57
Non-small cell lung cancer, growth factors, endothelial cells, 203
Nude rat, ureter, urinary bladder, transitional cells, transplantation, 61

Oncogene, c-*met*, regeneration, 119
Organotin, tumour promotion, neoplastic transformation, carcinogenesis, 167
Orotic acid, aristolochic acid, liver carcinogenesis, initiation, cell proliferation, 83
Ovarian cancer cells, calcium antagonist, calcium channels, Fura-2, 5

patellamide D, multidrug-resistance reversal, marine natural product, 97
Peptide analogs, prostate cancer, growth factors, 189
Phenethyl isothiocyanate, mouse lung neoplasia, benzo[*a*]-pyrene, DNA adducts, 35
Placental form, hepatocarcinogenesis, glutathione *S*-transferase, rat liver, immunohistochemistry, initiated hepatocytes, 89
^{32}P-postlabeling, mass spectrometry, *N*-(deoxyguanosin-8-yl)-1-amino-6-nitropyrene, 5-hydroxymethyl-2′-deoxyuridine, 8-hydroxy-2′-deoxyguanosine, 51
Polyamines, brain carcinogenesis, diamine oxidase, glioma, *N*-ethyl-*N*-nitrosourea, putrescine, 183
Polymerase chain reaction, lung cancer, smoking habit, class mu glutathione*S*-transferase, 151
Promotion process, 3-nitro-2,4,6-trihydroxybenzamide derivatives, two-stage transformation, BALB/3T3 cells, 5-lipoxygenase, 57
Prostate cancer, peptide analogs, growth factors, 189
Protein kinase C, hepatoma cells, tumor promoter, cell proliferation, calcium, epidermal growth factor, vasopressin, 103
Putrescine, brain carcinogenesis, diamine oxidase, glioma, *N*-ethyl-*N*-nitrosourea, polyamines, 183

Rat liver, hepatocarcinogenesis, glutathione*S*-transferase, placental form, immunohistochemistry, initiated hepatocytes, 89
Rat mammary carcinoma, tamoxifen, ethyl methanesulphonate, 19
Rats, cancer, electromagnetic fields, mammary gland, 75

Rb gene abnormalities, lung cancer, 67
Regeneration, c-*met*, oncogene, 119
Regeneration, TRPM-2, apoptosis, liver, gene expression, mitogen, 133
Retinoic acid, insulin-like growth factor II, neuroblastoma, differentiation, 177
RU486, antiproliferative effect, Burkitt lymphoma cells, 43

Salmonella assay, acenaphtho(1,2-b)quinolines, mutagenic activity, 1
Smoking habit, lung cancer, class mu glutathione*S*-transferase, polymerase chain reaction, 151
Spheroid, growth, agarose, 31

Tamoxifen, rat mammary carcinoma, ethyl methanesulphonate, 19
TGFβ, gene expression, cell cycle, 125
Tobacco, carcinogenesis, *N*-nitrosamines, tumours, A/J mice, 25
Transitional cells, ureter, urinary bladder, transplantation, nude rat, 61
Transplantation, ureter, urinary bladder, transitional cells, nude rat, 61
TRPM-2, apoptosis, liver, gene expression, mitogen, regeneration, 133
Tumor promoter, hepatoma cells, cell proliferation, protein kinase C, calcium, epidermal growth factor, vasopressin, 103
Tumor promotion, gap junctions, lung, mouse, carcinogenesis, 11
Tumour promotion, organotin, neoplastic transformation, carcinogenesis, 167
Tumours, tobacco, carcinogenesis, *N*-nitrosamines, A/J mice, 25
Two-stage transformation, 3-nitro-2,4,6-trihydroxybenzamide derivatives, promotion process, BALB/3T3 cells, 5-lipoxygenase, 57

Ureter, urinary bladder, transitional cells, transplantation, nude rat, 61
Urinary bladder, ureter, transitional cells, transplantation, nude rat, 61

Vasopressin, hepatoma cells, tumor promoter, cell proliferation, protein kinase C, calcium, epidermal growth factor, 103
